

Goat Kidding Record Sheet

Page 1 of 2 | Doe, breeding and kidding (one doe, one pregnancy)

goatgestationalcalculator.com

Print at 100% / Actual size

DOE

Doe name / ID

Breed

Date of birth

Tag / registration no.

Parity (this is kidding number)

Body condition score at breeding (1-5)

BREEDING

Buck name / ID

Breeding date (observed or AI)

Time of service (if known)

Breeding method

☐ Hand / pen mating ☐ Pasture exposure ☐ Artificial insemination

Alternative breeding date(s)

Buck exposure: first day

Buck exposure: last day

Pregnancy check date

Method (ultrasound, blood test)

Result / kids counted

DUE-DATE PLAN

Expected kidding date

Normal window opens (day 145)

Normal window closes (day 155)

Planned dry-off date (dairy doe)

Pre-kidding vaccine date (per vet)

Move to kidding pen

Tip: enter the breeding date at goatgestationalcalculator.com and switch on "Dairy doe currently in milk" to get the expected kidding date, the 145-155 day window and a planned dry-off date. With pasture exposure, calculate from both the first and last exposure day.

KIDDING

Actual kidding date

Time first kid born

Actual gestation length (days)

Kids born (alive / dead)

Assistance

☐ None ☐ Minor help ☐ Major help ☐ Veterinarian

Placenta passed (time)

Doe first ate / drank (time)

Udder / milk notes

Doe notes (behavior, temperature taken by you or vet, discharge, anything unusual)

Goat Kidding Record Sheet

BIRTH RECORD

Kid ID / tag	Sex (M/F)	Birth order	Birth weight (lb / kg)	Presentation (front/back)	Assisted? (Y/N)	Nursed or fed colostrum (time)	Dam accepts? (Y/N/part)	Notes
